

F2308 FOAM EFFECT NOZZLE

Technical Characteristics

Foamy water column that will jazz your fountain up.

Foaming nozzle creates a foamy water column that will jazz your fountain up. Its stream is strong and vibrant, so it keeps the flow even when the wind is intense. Unit has ball inside that mixes the air and the water in perfect proportion.

Foam Jet Nozzle is the best cost-effective choice for water mass effect. Very nice performance and very good water consumption
