

FONTA

## F2309 CLUSTER MULTI JET

### Technical Characteristics

The specific outlet creates a special water column, and its effect looks magical in the outdoor fountains.

The standard is an 8-hole nozzle, where each orifice is an 5 mm in diameter. However, the number of cavities and (or) its width will be customized according to your requirements.

The unit's swivel head is adjustable from the top - very easily. Can be made of 304 S.S. , 316 S.S. or brass

Jet Height Mtr	LPM	Head Mtr	Bar.
1.00	37	1.80	0.18
1.50	54	2.50	0.25
2.00	61	3.50	0.35
2.50	68	4.30	0.43
3.00	71	4.80	0.48
3.50	78	5.70	0.57
4.00	85	6.30	0.63
